

Invent a V.E.S.T.!

Mango and Brash need your help! S.U.I.T. has just contacted them about a very important mission. There's only one problem—they need the perfect V.E.S.T. (Very Exciting Spy Technology, that is).

Using recyclable materials, invent the zaniest, wackiest, most fantastic V.E.S.T. you can imagine! Will the cardboard from a roll of paper-towels be used as a portable sewer pipe that Mango and Brash can escape into at any moment? A milk-carton megaphone that can project an important message directly into the ears of the person you need to hear it?

Gather your supplies and start inventing! Then write an explanation of your V.E.S.T. for the S.U.I.T. Catalog of Curiosities to keep a record of it.

WHAT YOU NEED

- ✓ Empty, paper-towel and/or toilet-paper rolls
- ✓ Empty, rinsed-out milk cartons
- ✓ Cardboard boxes
- ✓ Paper grocery bags
- ✓ Empty, rinsed-out soda cans
